

WRITING TASK 2

Write a paragraph about the topic given below by answering the questions.

"The first technological product you owned"

- 1- What was the product?
- 2- Where and when did you get it?
- 3- What did you do when you first had it?
- 4- Do you still own this product?

Task: "Describe an important technological product you owned/bought"

I have bought a few technological products so far, and **in my opinion**, the most significant and first product was my computer. I tried to save up enough money to buy a PC, but unfortunately, computers were very expensive to buy. Luckily, my father helped me by giving the rest of the money, **so** I bought a PC from Amazon in 2021. The first thing that I did was playing computer games. **Besides**, I watched my favourite TV series such as The Office and Mr. Robot. This is a very important tech device to me, **as** it was the very first thing that I bought. **Furthermore**, having a PC is so useful for many reasons. I still have my PC and use it daily. It serves as a very helpful tool for me to seek information and relax by surfing on the net. There is one more reason why I believe computers is greatly helpful is that it offers us easy access to up-to-date information on online news, which is nearly free of charge. **To sum up**, my computer is an important technological product for me.
