

Task: Write a paragraph about what you are good at

### My Expertise

In life, everybody has a skill. That means, everyone is good at something. Some people are good at playing football, some others are good at speaking in front of the public, or playing a musical instrument. Like everybody, I also have some skills, and as far as I know, I am really good at playing chess. **Why do I think that I am good at chess?** *Well, to be frank,* I have always been a winner in chess competitions. I learnt how to play chess when I was in primary school. My tutor was my grandfather, who was the winner of the Turkish Chess Championship 10 times. Later, I attended courses and improved my skill. My parents, teachers, and friends encourage me to improve myself further. *Thanks to* their support, I believe I will become much better in the near future. **Consequently,** *what I am trying to say is that* everyone has a skill. *That is why* we need to find that skill and improve it. Like everybody, I am bad at some things and good at some things. *As far as I know,* playing chess is the thing which I do best. **Therefore,** I can claim that it is my expertise.
