Paragraph Writing: "Opinion Paragraph"

Task: Write an <u>opinion paragraph</u> about this idea:

"Education should be free of charge."

Do you agree or disagree?

Whats's your opinion? Support your arguments.

Education is very important and it plays a vital role in our socities all over the world. We need to improve educational systems and **there are two *controversy* views about it. Some people believe that** free education for all people can improve education itself. **On the other hand,** **some people claim that** education should not be free for everybody because free education is not good according to them. **However, from my point of view, education should be free because it is an essential part of life and should be available to everyone regardless of their financial situation**. ***First of all,*** education is a basic human right, and it is essential for people to be able to access the knowledge they need in order to thrive in our increasingly globalized world. ***Secondly,*** free education would **also** help level the socioeconomic playing field, allowing people of all backgrounds the opportunity to pursue their dreams and build a better future for themselves and their families. **Additionally,** it can help to reduce poverty and inequality and create a more equitable society. ***To sum up,*** as I have mentione above, we can get better education when it is free to everybody and easily accessible for everyone.
